

## Wellington City 1m Contours Metadata

<b>Name:</b>	Wellington City 1m Contours
<b>Abstract:</b>	1m contours for urban Wellington created from 2009 aerial photography.
<b>Purpose of data:</b>	Wellington City Council business
<b>Area of coverage:</b>	Urban Wellington including Makara Beach and Makara Village
<b>Date of capture / date created:</b>	Based on a DTM created from 2006 LiDAR and 2009 photogrammetry masspoints and breaklines
<b>Data type:</b>	Vector
<b>Native data format:</b>	Arc SDE Geodatabase
<b>Update frequency:</b>	Not updated
<b>Accuracy:</b>	+/- 0.5m in most areas (vertical). In some areas particularly in dense vegetation where no LiDAR data is available, the DTM is estimated and therefore less accurate.
<b>Accuracy statement:</b>	Wellington City GIS data has been compiled from a number of sources and its accuracy may vary. This data is provided "as is" without warranty of any kind. The Wellington City Council recommends that you independently verify the accuracy, currency and reliability of any information upon which you intend to rely. The GIS data made available by Wellington City Council may be amended and updated by the Council without notification. There may be significant delays before data is updated to reflect changes in an area.
<b>Image resolution / ground sample distance:</b>	Not applicable
<b>Dataset history:</b>	LiDAR captured by AAMHatch March 2006. Points were removed where significant changes in the terrain were detected as part of the photogrammetry process in 2009. Mass points and breaklines were captured by Terralink from 2009 aerial photography.  WCC generalised the contours by up to 0.2m in order to reduce the number of vertices in the dataset.
<b>Coordinate System:</b>	Horizontal Coordinate System: NZTM Geodetic Model: NZGD2000 Vertical Coordinate System: MSL Wellington 1953
<b>License:</b>	<a href="#">Creative Commons Attribution 3.0 New Zealand</a>
<b>Additional Notes:</b>	Contours generated from LiDAR and photogrammetry should not be used for detailed engineering design.
