### Description

#### Abstract

Block Group level data from the American Community Survey; 5 year average, years 2010-2014. The original census block group boundaries have been adjusted to various Denver GIS data layers to increase the spatial accuracy of this data. Although every effort was made to ensure the accurate rectification of the data, due to geographic problems inherent in the original 2010 census block group data, errors may exist. The data-set does not contain data for any enclaves administered by other jurisdictions that are located within the City and County of Denver's boundary. This data is a sample, not a census. Results should be considered estimates. Margin of error data provided where appropriate. See American Community Survey website for additional information.

#### Purpose

This data set should be used for planning and analysis of activities that are within the City and County of Denver.
