Description

Abstract

The U.S. Census Bureau's year 2010 census block group boundaries and data for the City and County of Denver. The original census block group boundaries have been adjusted to various Denver GIS data layers to increase the spatial accuracy of this data. Although every effort was made to ensure the accurate rectification of the data, due to geographic problems inherent in the original 2010 TIGER shapefiles, errors may exist. This data-set includes the housing and population data from redistricting file P.L. 94-171 of the 2010 census. The data-set does not contain data for any enclaves administered by other jurisdictions that are located within the City and County of Denver's boundary.

Purpose

This data set should be used for planning and analysis of activities that are within the City and County of Denver.
